EXPERIENCE

Technology Analyst

Mätch VC (Remote)
02/2026 - Present

- Evaluated AI startups and emerging technologies across Europe and Southeast Asia to inform investment decisions.
- Conducted technical due diligence on software products, AI infrastructure, and engineering teams, assessing scalability and technical risk.
- Authored investment research reports analyzing market trends, competitive positioning, and product differentiation.
- Partnered with investment professionals to identify and prioritize high-potential technology companies.

DT Excellence Center Project Intern

Deutsche Telekom IT Solutions
09/2025 - 12/2025

- Designed a Microsoft Teams chatbot supporting one-click and multi-step surveys, streamlining internal feedback collection.
- Built an end-to-end survey flow prototype in Python integrating external voting APIs, state management, and user input handling, validating the feasibility of in-chat voting workflows.

Project Intern

Ministry of Post and Communication
06/2025 - 08/2025

- Conducted field research and factory visits with 8 local producers to inform the design of visibility and income-growth solutions.
- Proposed and presented 2 initiatives — a one-day tour and a digital walking-street map of Phnom Penh — to program stakeholders.
- Published an awareness article on Takeo products, increasing public interest in and support for local producers.

PROJECTS

E-Commerce Website for Cambodia's Products

Spring Boot, React, PostgreSQL

- Built a full-stack e-commerce platform using Spring Boot, PostgreSQL, and React, enabling local producers to showcase and sell products to buyers across Cambodia.
- Automated product uploads via a Telegram bot integrated with the backend.

GitHub: [HERE](#)

Sign Language to Subtitle Converter

Python, LSTM, Computer Vision

- Developed a real-time sign-language-to-subtitle system using computer vision and an LLM (SEA-LION), enabling instant translation with English as the default output.
- Designed as an inclusive ed-tech solution to improve accessibility for hearing-impaired students.

SUMMARY

Computer Science student with hands-on experience across software engineering, artificial intelligence, and venture capital analysis. Currently evaluates AI startups and infrastructure at Mätch VC, building on prior work developing chatbot and NLP prototypes at Deutsche Telekom IT Solutions. Has independently built full-stack platforms spanning accessibility (sign-language translation), e-commerce for local producers, and civic/tourism technology. Recognized in international innovation competitions and sustainability-focused programs; motivated by building scalable technology with measurable social impact.

SKILLS

Python
Java
JavaScript / PHP
PostgreSQL / SQL
Spring Boot / React
REST APIs
Natural Language Processing (NLP)
TensorFlow / Keras / PyTorch
Research & Data Analysis
Problem Solving & Analytical Thinking
Project Management
Entrepreneurship / Innovation
Team Collaboration

EDUCATION

Computer Science

University of Pécs
09/2024 - 04/2027
Bachelor's degree

LANGUAGES

Khmer	Native
English	Fluent
Japanese	Intermediate
German	Basic
Hungarian	Basic

AWARDS & RECOGNITION

PAN-SEA AI Competition 2025 — Innovation Award
HEINEKEN Sustainathon 2024 — 1st Place
Fort Hays Faulkner Challenge 2024 — 3rd Place
ASEAN-China-India Youth Leadership 2024 — Innovation Award
